

Dear Colleagues,

On behalf of the Serbian Chemical Society, Faculty of Technology and Metallurgy of the University of Belgrade, we are delighted to announce that the 29th International Symposium on Separation Sciences (ISSS 2025) will be held in Belgrade, Serbia, from **September 25th until 27th**.

The symposium focuses on the fundamental and practical aspects of separation and detection methods, sample preparation and related or combined and miniaturized techniques applied for analytical, food chemistry, preparative and industrial purposes.

The symposium brings together scientists and users of chromatography, electrophoresis and related or combined techniques, coming from the academic and industrial world from all over the world, giving them the opportunity to present their latest scientific results in different fields of science separation and to establish new collaborations.

The scientific program includes plenary and keynote lectures by invited speakers, as well as oral and poster presentations for senior and junior scientists working in the field of separation sciences. Particular attention is paid to the younger generations with a session of oral presentations.

We eagerly look forward to your presence in Belgrade, the charming capital of Serbia, located on the confluence of the Sava and Danube rivers.

You are cordially invited to join us,
Živoslav Tešić
